PROFESSIONAL SUMMARY

Engineer experienced in building and deploying production systems across backend and frontend. Designed and shipped an AI SaaS platform focused on automating real-world workflows, with strong foundations in Python, FastAPI, and modern React-based development. Focused on building reliable systems that solve practical problems.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: FastAPI, Node.js, REST APIs, async processing, Celery

Frontend: React, Next.js, TanStack Start, Tailwind CSS

Data, AI & Tools: PostgreSQL, Redis, Supabase, Prisma, LangGraph, LangChain, Claude API, Hugging Face, Railway, Vercel, Docker, GitHub Actions, Twilio

EXPERIENCE

Full-Stack Engineer · Freelance / Independent · Doha, Qatar · Oct 2023 - Present

- Built and deployed an AI-driven SaaS platform (FlowIQ) to automate real-world workflows through messaging-based interactions
- Designed backend systems using Python, FastAPI, PostgreSQL, and Redis to support scalable and concurrent usage
- Implemented asynchronous processing and reliability mechanisms for scheduling, background tasks, and system stability
- Deployed and maintained production applications using Railway and Vercel
- Developed full-stack applications including dashboards, job boards, and content platforms, handling the full lifecycle from development to deployment

Frontend Developer · GnG Esports · Tunisia · Feb 2023 - Sep 2023

- Built a production React application from scratch in collaboration with designers and stakeholders
- Increased user engagement by 40% through performance optimization, animation tuning, and responsive design

Full-Stack Developer Intern · ATB Bank · Tunisia · Feb 2022 - Jul 2022

- Developed a digital banking prototype with JWT authentication and real-time account data rendering
- Reduced perceived frontend latency by 35% through optimized API handling and efficient state management

EDUCATION

Bachelor's in E-Business — Higher School of Economic and Commercial Sciences, Tunisia | 2022
